

SENIORS' FIRE SAFETY PROGRAMS

1. Older and Wiser: A fire safety education program for older adults

Statistics show that adults over age 65 are at the highest risk of being killed or injured in a fire. To address this serious problem, the Ontario Fire Marshal's Public Fire Safety Council developed *Older & Wiser*, a fire safety program specifically for older adults. The program is designed to be delivered by municipal fire departments with the assistance of community groups, home support workers, the media, and friends and families of older adults.

2. Remembering When: A fire and fall prevention program for older adults

People 65 and older are twice as likely to be killed or injured by fires and falls than the population at large. Designed for a multicultural audience, *Remembering When* is a complete, step-by-step program that teaches life-saving lessons to this high-risk group. It includes lesson plans, brochures, fact sheets, game cards, and more!

3. Seniors Fire Safety with Jonathan Winters (includes instructor's guide)

In this award-winning 18-minute video, comedian Jonathan Winters, a senior himself, focuses on the special fire-safety considerations of older adults.

Help people in your community protect themselves with life-saving information on the following:

- leading causes of home fires
- basic fire prevention techniques
- how to react if fire starts
- importance of testing smoke detectors regularly
